Declarations

1. Funding sources

This study was not founded by any foundation.

2. Conflicts of interest/Competing interests

The authors have no conflicts of interest to declare.

3. Ethics approval

No assistance in the preparation of this article is to be declared. Ethical approval is not required in the study for the used data all came from the published literatures and materials.

4. Consent for participation

No assistance in the preparation of this article is to be declared.

5. Consent for publication

No assistance in the preparation of this article is to be declared.

6. Availability of data and material

The data and material that support the findings of this study are available within the article or its supplementary materials.

7. Code availability

The study was performed by software package Tree-Age pro 2011. The TreeAge Pro Trex files are available from the corresponding author on reasonable request.

8. Authors' contribution

C. Huang made substantial contributions to the conception and design of the work; D. Wu drafted the work and contributed to the acquisition, analysis and interpretation of the data; H. Huang contributed to the literature and data management; J. Li and Y. Wang contributed lung cancer surgery and chemotherapy related cost measures assistance and guidance.
